

## Problem Card

GB Sci-Fi = 4

WS Total = 26

WS Comedy = GB Sci-Fi

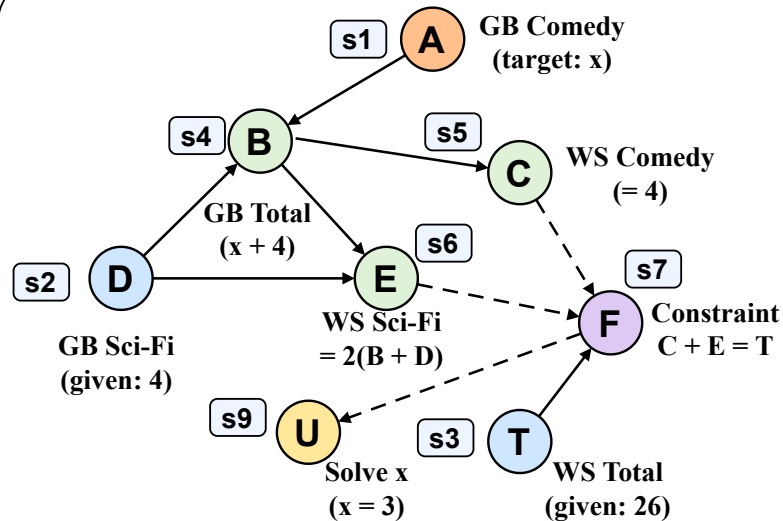

WS Sci-Fi = 2 × (GB Total + GB Sci-Fi)

GB Total = GB Comedy + GB Sci-Fi

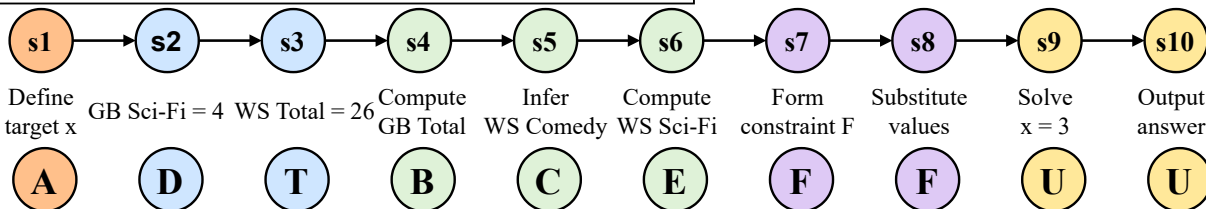

**Question:** Find the number of upbeat metropolis comedy films in Golden Banana Movie Festival.

## Multi-Branch Reasoning DAG Reconstruction

## Dependency DAG ( $y^+$ )

## Linearized Chosen Trace ( $y^+ = 10$ -step process)

Answer:  
 $x = 3$   
✓

## Computation

B: GB Total( $x + 4$ )

D: GB Sci-Fi(given: 4)

E: WS Sci-Fi

$$E = 2(B + D) = 2x + 16 \quad \checkmark$$

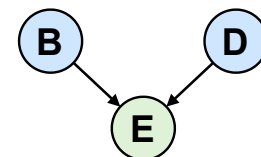

arithmetic error

$$E = 2(B + D) = 2x + 8 \quad \times$$

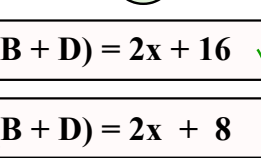

Local computation error from a mini-DAG.

## Structured Rejected Responses (2×2)

## Dependency

$$E = 2(B + D) \quad \checkmark$$

dependency mismatch

$$E = 2(C + D) \quad \times$$

Logical dependency mismatch from a mini-DAG

B: GB Total

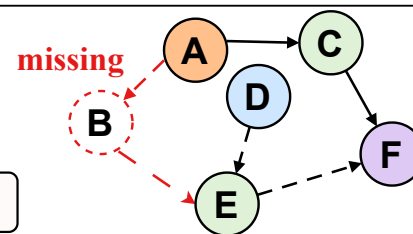

D: GB Sci-Fi

$$E: B + D \quad \checkmark$$

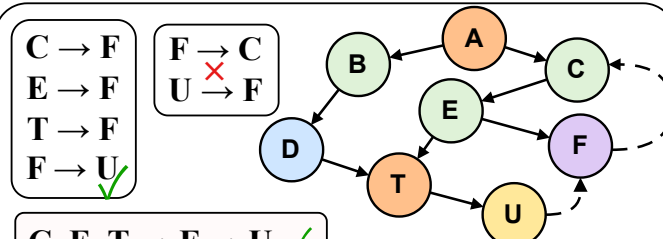

$$E: D \quad \times$$

Ungrounded computation from a mini-DAG

Missing-Node

ungrounded computation

topological violation

$$U \rightarrow F \rightarrow C \quad \times$$

Topological order violation from a mini-DAG.
